131.3.31.69
Confidential

(b) **Digital Sign on single and Bulk Docu.**

(i) Digital Sign(DS) at **Default** loc (Predefined by Appl itself i.e. Centre bottom of page with subsequent signs on top of first sign from left to right). Addn options avlb to the user are as under:-

(aa) DS on First Page.

(ab) DS on Last Page.

(abc) DS on Bulk Sign

(a) **Bulk sign** check box is use for DS on multiple files for First or custom page.

(b) Select only folder which contain all files for use DS.

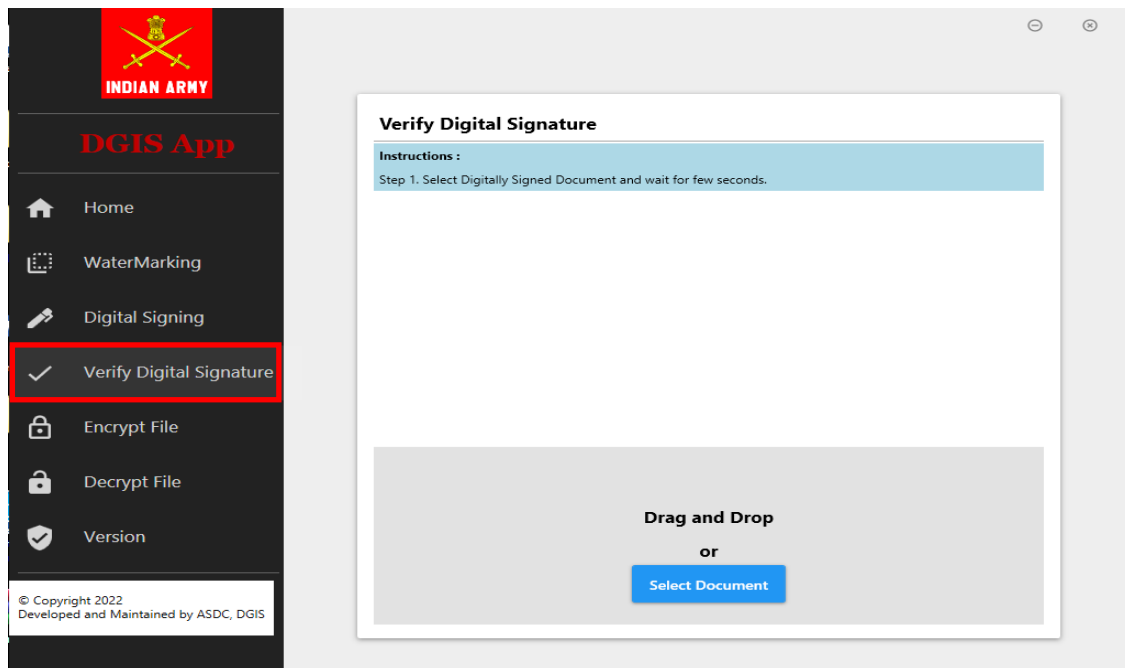

(ii) DS on **Custom** loc defined/ selected by user.

(iii) **Custom Text on Top of Sign**- User defined text on top of Digital Sign.

The screenshot displays the DGIS App interface. On the left is a dark sidebar with the Indian Army logo and the text 'INDIAN ARMY' and 'DGIS App'. Below this are navigation icons and labels: Home, WaterMarking, Digital Signing, Verify Digital Signature, Encrypt File, Decrypt File, Version, and Help. The main content area is titled 'Digital Signing (Only for PDF/Word document)'. It includes an 'Instructions' section with four steps: 1. Insert Army issued Digital Signature Key in USB Port. 2. Select document to be digitally signed. 3. Select path for saving digitally signed document. Wait for few seconds. 4. Click OK to create digitally signed file (new file name :- originalfilename_DS_date_milisecond.pdf). A note states: 'Original file is not changed.' Below the instructions is the 'Select Signature Location' section with three options: 'Default' (selected), 'Custom', and 'Check Crl'. The 'Select Page No for Printing Digital Signature' section has three options: 'First Page' (selected), 'Last Page', and 'Bulk Sign'. The 'Custom Text on Top of Signature' section has a text input field with the placeholder 'Ex. Recommended/Not Recommended/Sanctioned/Not Sanctioned'. The 'Select PDF/Word Document for Digital Signing' section has a 'Drag and Drop (PDF/Word document Only)' area and a 'Select Document' button.

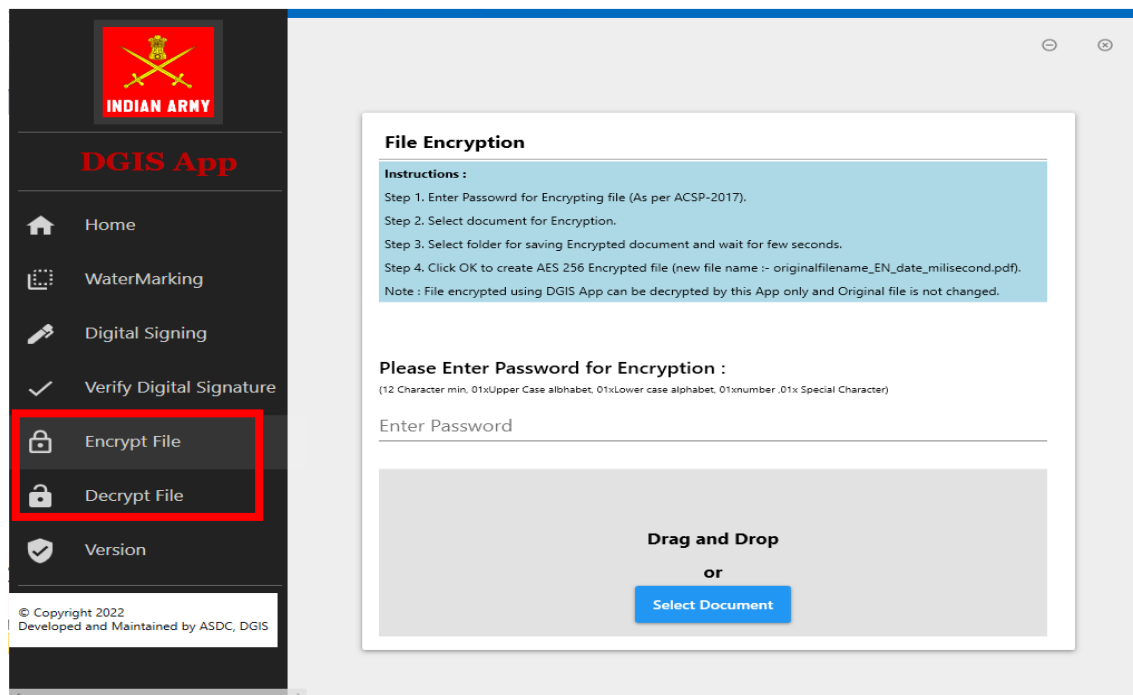

(c) **Verification of Digital Sign.**

(d) **File Encryption & Decryption.**

- (i) Enter password with at least 16 characters as per ACSP-2023.
- (ii) File should encrypt with *.mil extn.
- (iii) Original file is not changed.
- (iv) File encrypted using DGIS App can be decrypted by this App only.

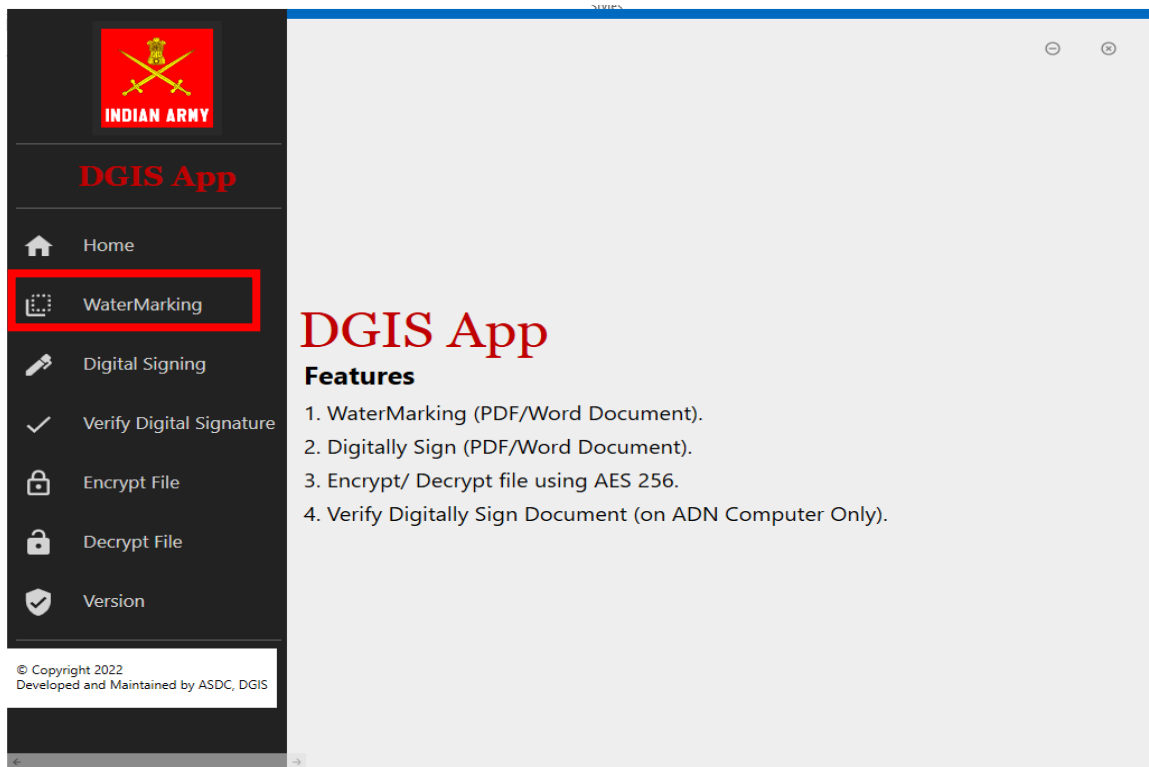

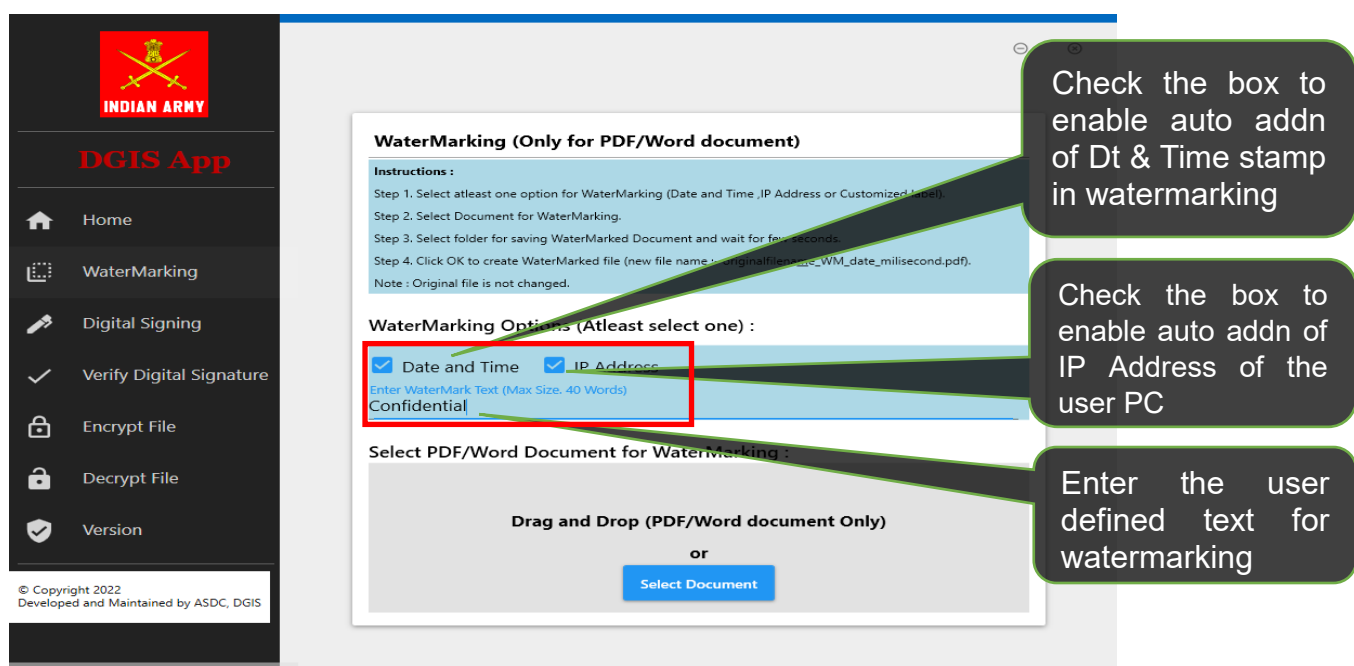

Watermarking

7. **Document Watermarking** The appl can watermark any MS Word or PDF docu. Procedure for watermarking is as follows:-

(a) Open the DGIS App from the shortcut on your desktop & click on Watermarking.

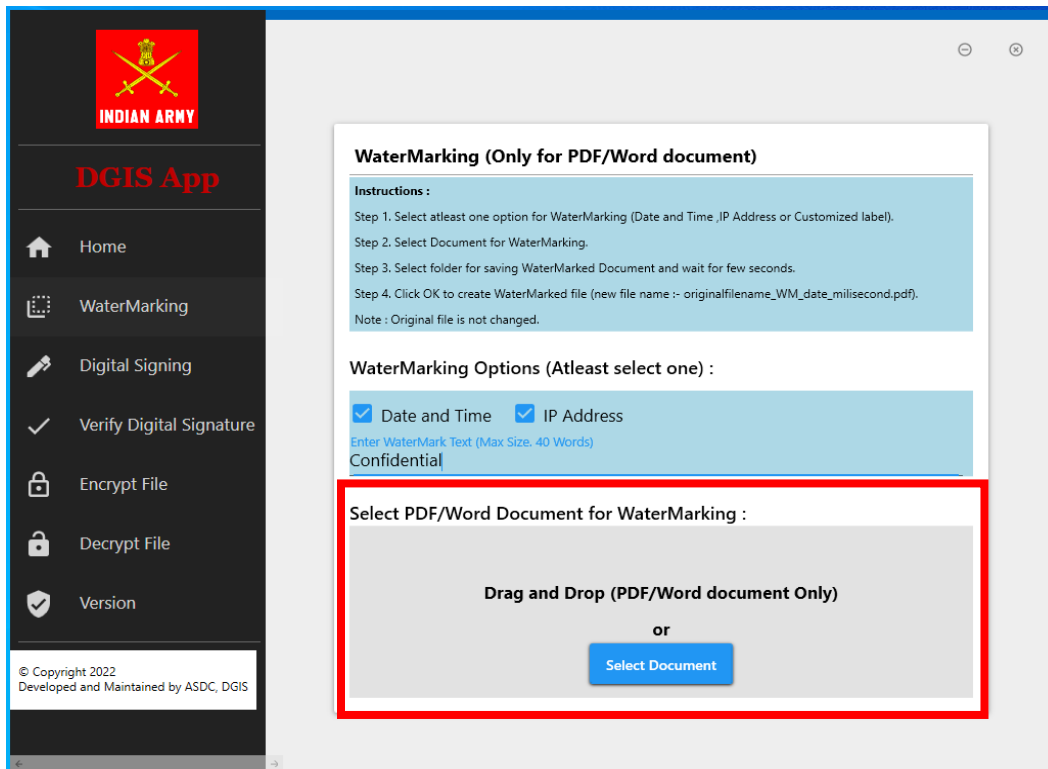

(b) DGIS App will provide watermarking window. Check the desired watermarking option or enter the text for water marking.

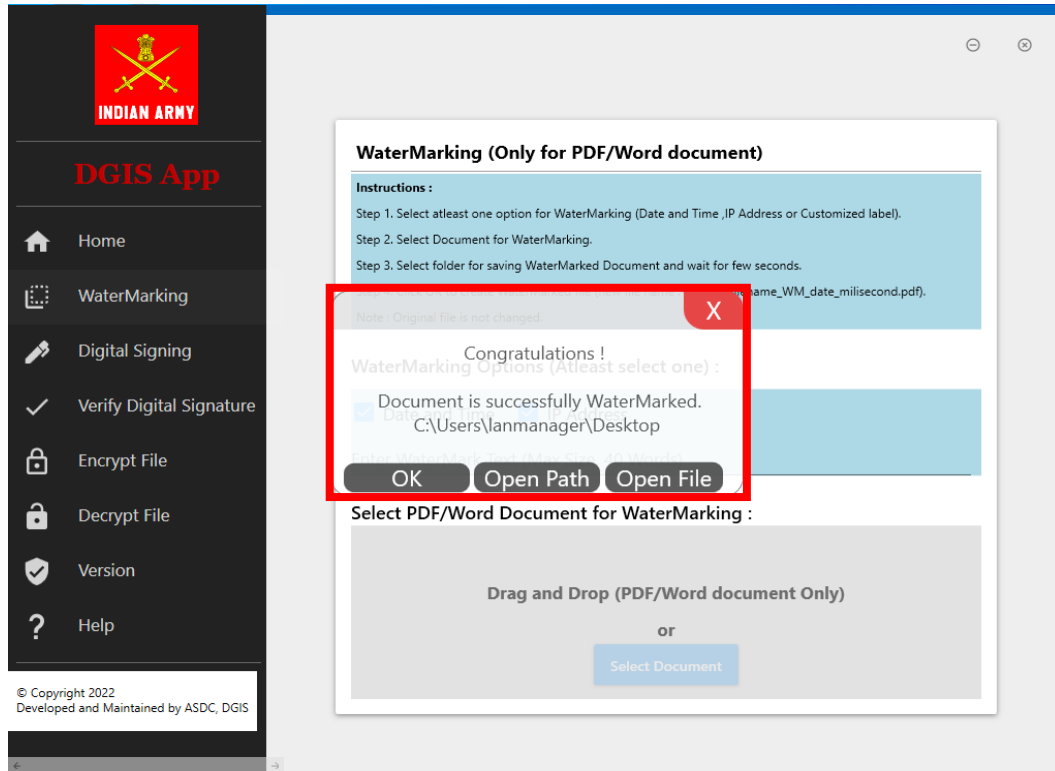

(c) Click on **Select Document** or **drag-drop** the docu (pdf/docs) inside selection window for watermarking and wait.

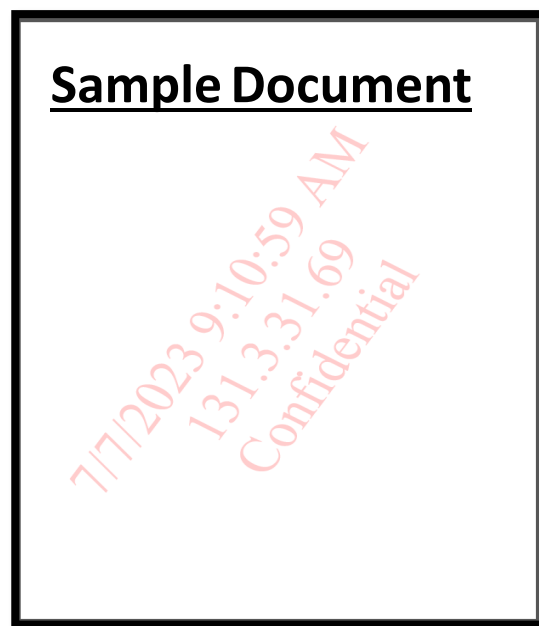

(d) Prompt will confirm the successful watermarking of docu.

*Note that the watermarked file will be automatically stored at the loc from where the file was selected with different naming convention (Original_name_of_file + **WM_dt**)

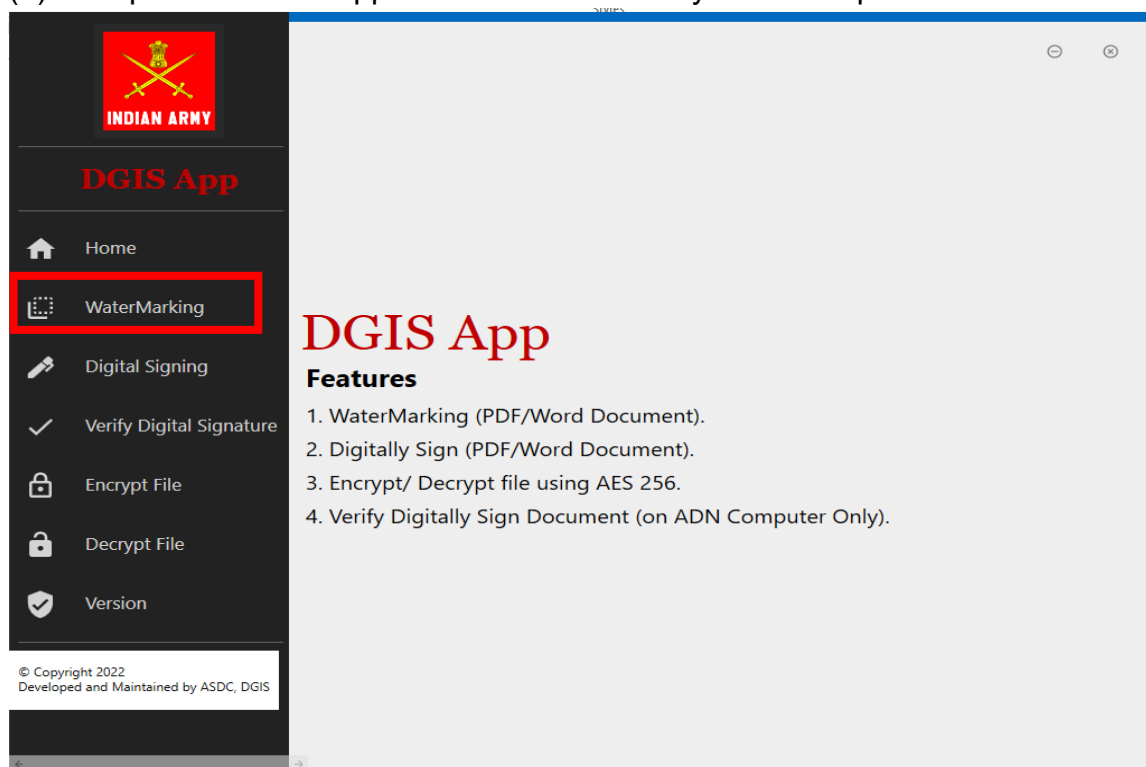

(e) Sample docu with watermarking:-

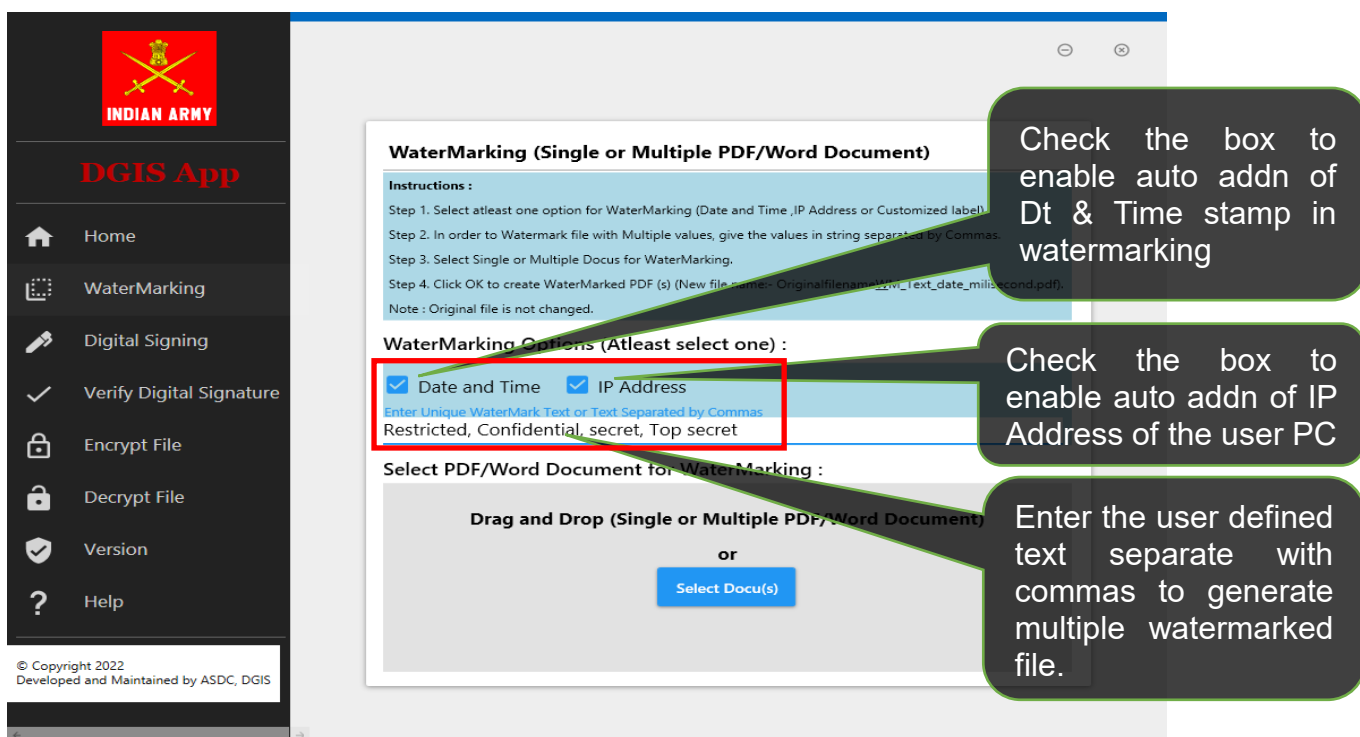

8. **Bulk Document Watermarking** The appl can also watermark multiple MS Word or PDF docu & Single file multiple watermarking. Procedure for watermarking is as follows:-

(a) Open the DGIS App from the shortcuts on your desktop & click on Watermarking.

(b) DGIS App will provide watermarking window. Check the desired watermarking option or enter the text for water marking.

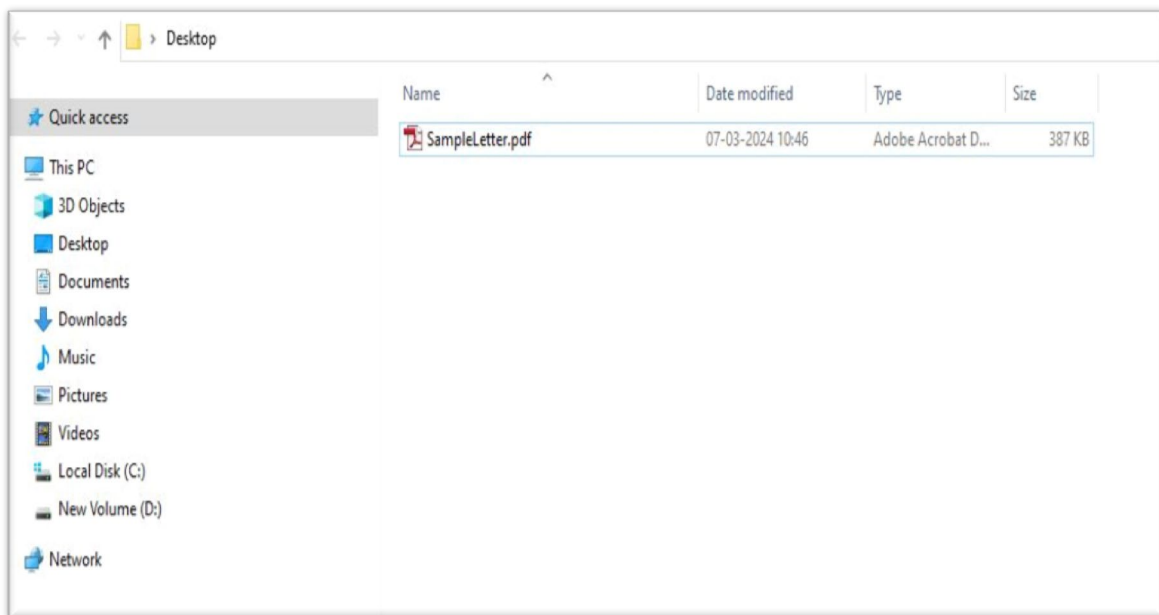

(c) Type watermarking text

(d) Click on **Select Document** or **drag-drop** the docu (pdf/docs) inside selection window for watermarking and wait.

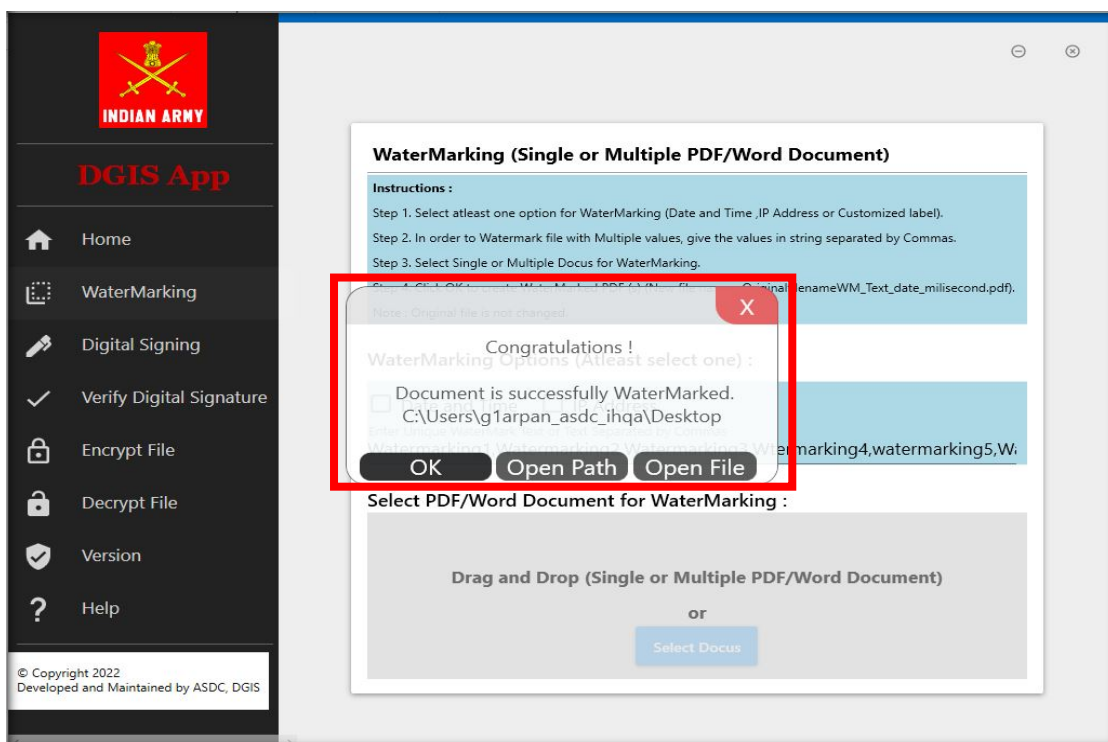

(e) Open folder with 1x Sample Pdf/Word Docu

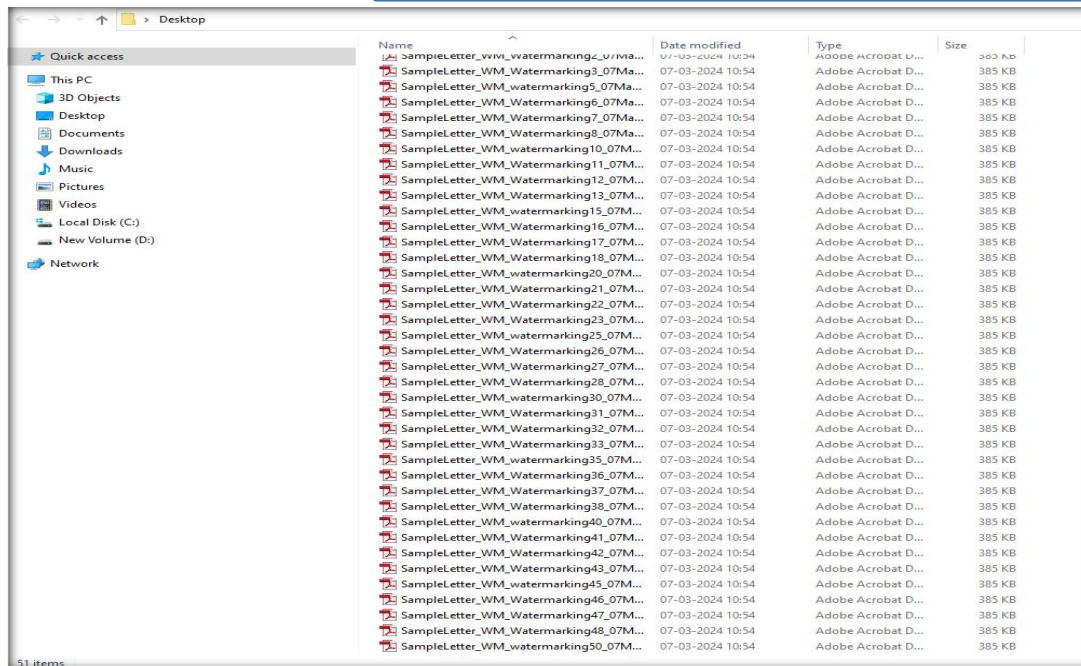

(f) Prompt will confirm the successful watermarking of docu.

*Note that the watermarked file will be automatically stored at the loc from where the file was selected with different naming convention (Original_name_of_file + **WM_dt**)

(g) Output folder with 51x Sample Pdf/Word Docu

On the **Insert** tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look.

You can easily change the formatting of selected text in the document text by choosing a look for the selected text from the **Quick Styles** gallery on the **Home** tab. You can also format text directly by using the other controls on the **Home** tab. Most controls offer a choice of using the look from the current theme or using a format that you specify directly.

To change the overall look of your document, choose new Theme elements on the **Page Layout** tab. To change the looks available in the **Quick Style** gallery, use the **Change Current Quick Style Set** command. Both the Themes gallery and the **Quick Styles** gallery provide reset commands so that you can always restore the look of your document to the original contained in your current template.

Digital Signing

9. Introduction.

(a) Digital Sign(DS) at **Default** loc (predefined by Appl itself i.e. Centre bottom of page with subsequent DS on top of first DS from left to right). Addl options avlb to the user are as under:-

(i) DS on First Page.

(ii) DS on Last Page.

(iii) DS on Bulk Sign

(a) **Bulk sign** check box is use for DS on multiple files for First or custom page.

(b) Select only folder which contain all files for use DS.

(b) DS on **Custom** loc selected by user.

(c) **Custom Text on Top of Sign**- User defined text on top of DS.

For DS > Open DGIS App & click on “**Digital Signing**” -

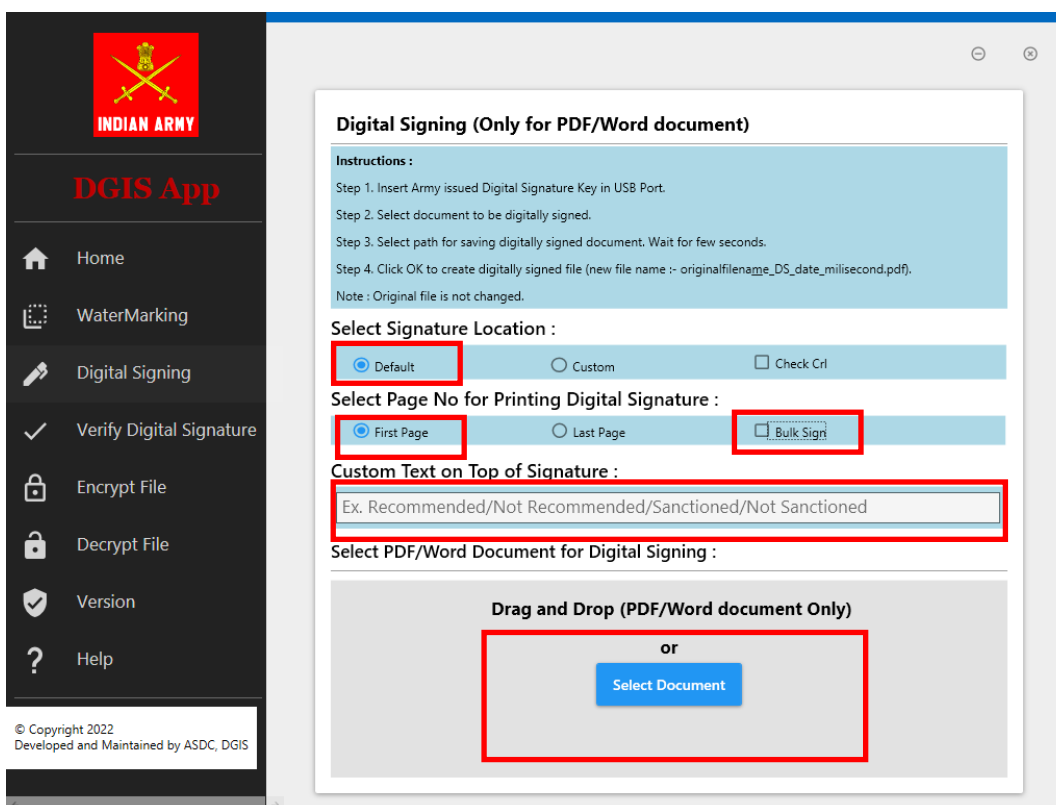

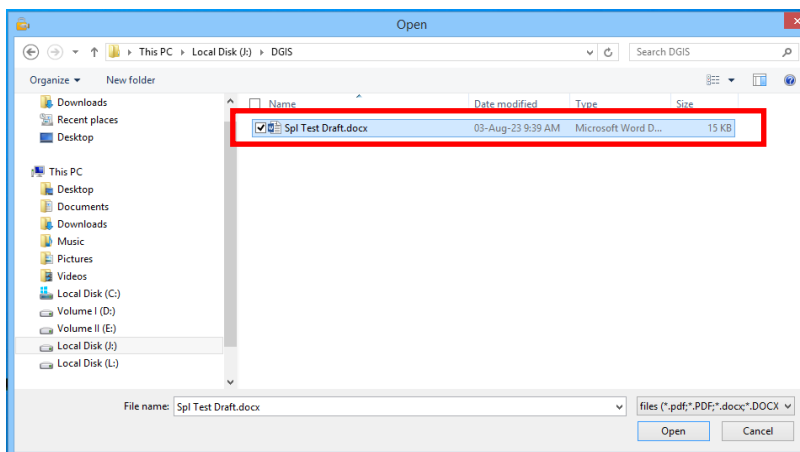

10. Default Sign

***Note-** Make sure the Digital Token is inserted (i.e. IACA Token for ADN or Valid Civ DS Token for Standalone mode).

- (a) Select the page on which the DS to be carried out i.e. “First Page or Last Page” .
- (b) Write remarks (**Custom Text**) if reqd with Sign.
- (c) Click on **Select Docu** or drag-drop the docu (pdf/docx) inside selection window.

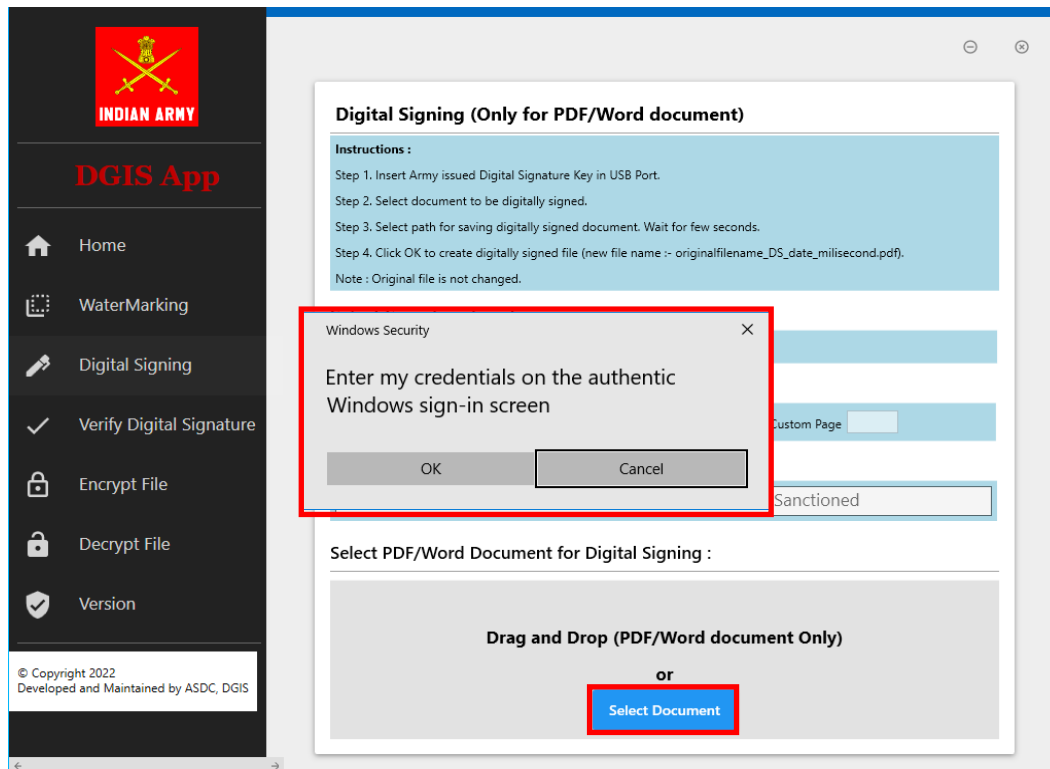

- (d) Browse the file you want to digitally Sign & select. Wait for next prompt.

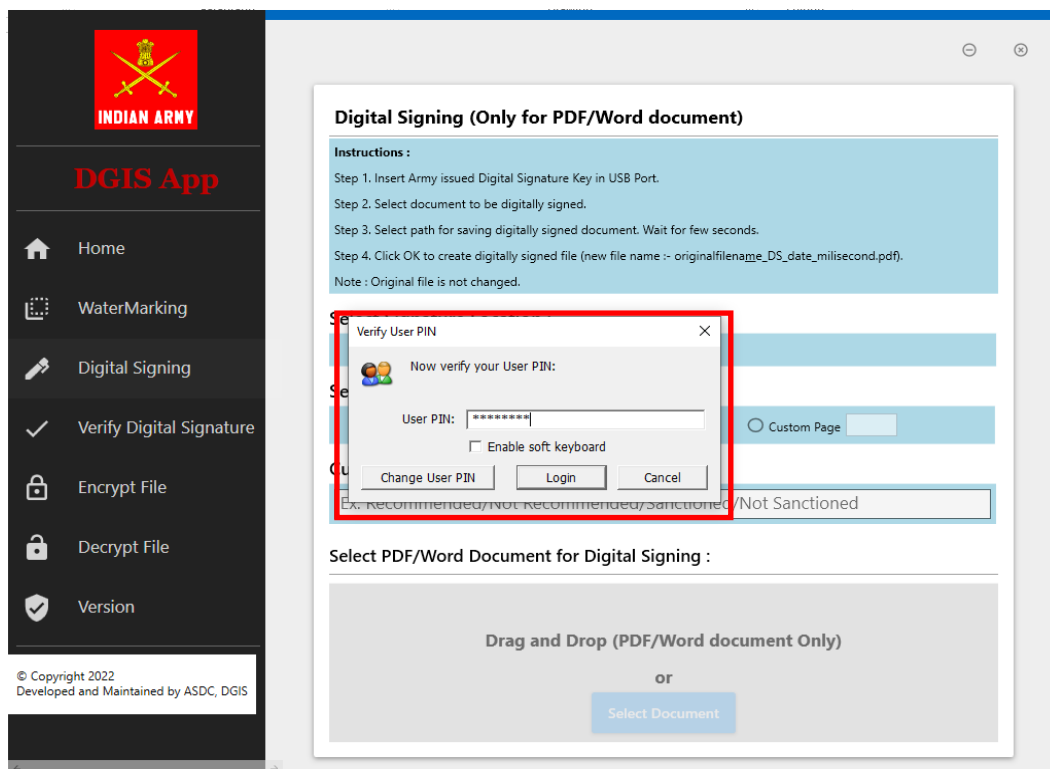

(e) In case the multiple tokens are att, fwg prompt will appear to select the desired token. Press ok > Ctrl+Alt+Del and select the valid DS token.

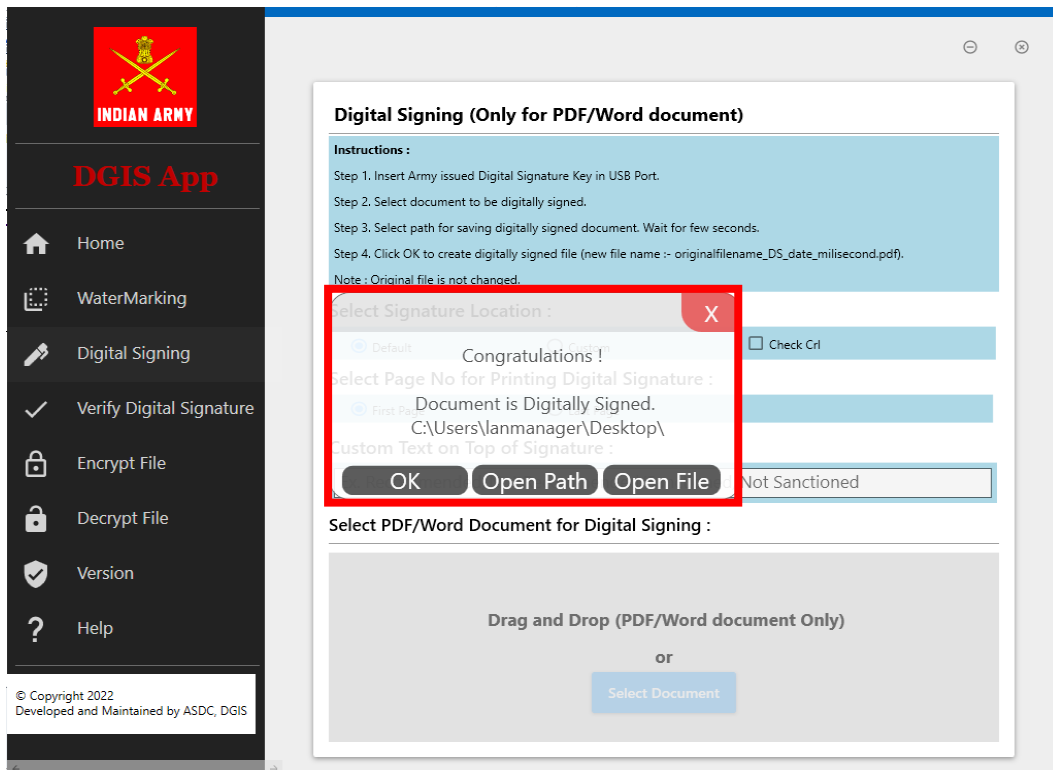

(f) Pl enter valid token PIN and click on **login** & wait for the next prompt.

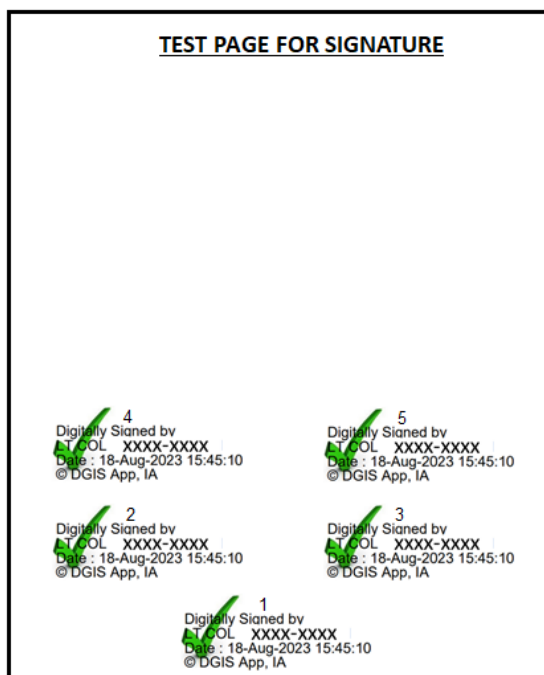

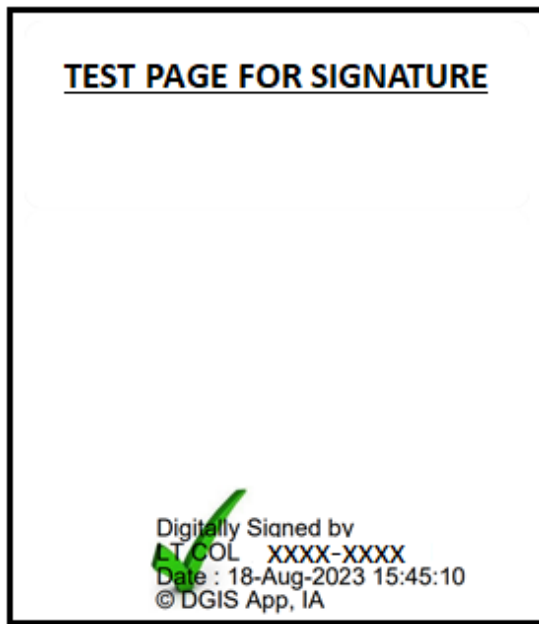

(g) Prompt confirms that the file has been Digitally Signed.

(k) Sample files with single and multiple DS (Default Loc).

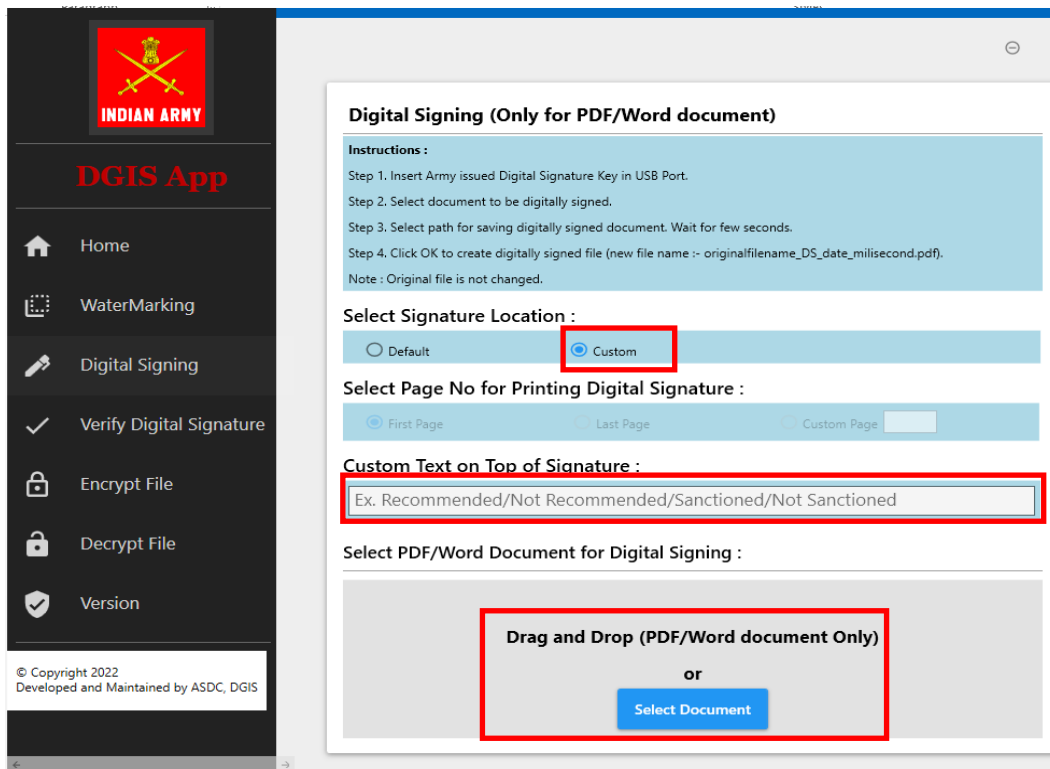

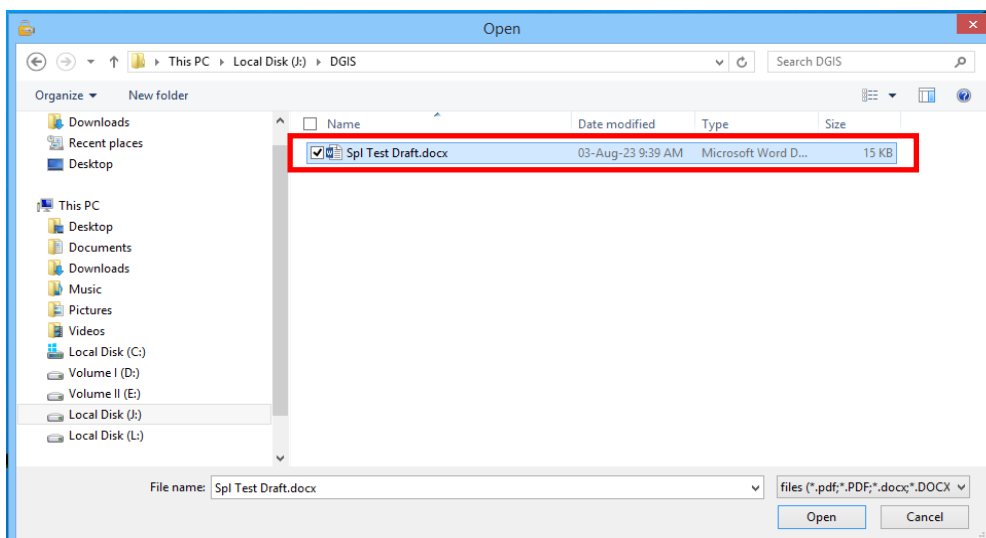

11. Custom Sign.

***Note-** Make sure the Digital Token is inserted (i.e. IACA Token for ADN or Valid Civ DS Token for Standalone mode).

- (a) **Custom** – DS on user defined loc along with custom text (if reqd with Sign).
- (b) Click on **Select Docu** or drag-drop the docu inside selection window.

- (c) Browse to the file you want to DS & select. Wait until docu loads.

(d) Docu open in new browser automatically and then Scroll to the loc and draw rectangle where you want to DS sign, wait till the popup appears.

13. Bulk Sign

- (a) Click on Bulk Sign & Select or drag only folder which contain files for Digital Sign.

- (b) Sample of Multi Digital Sign docu is shown below:-

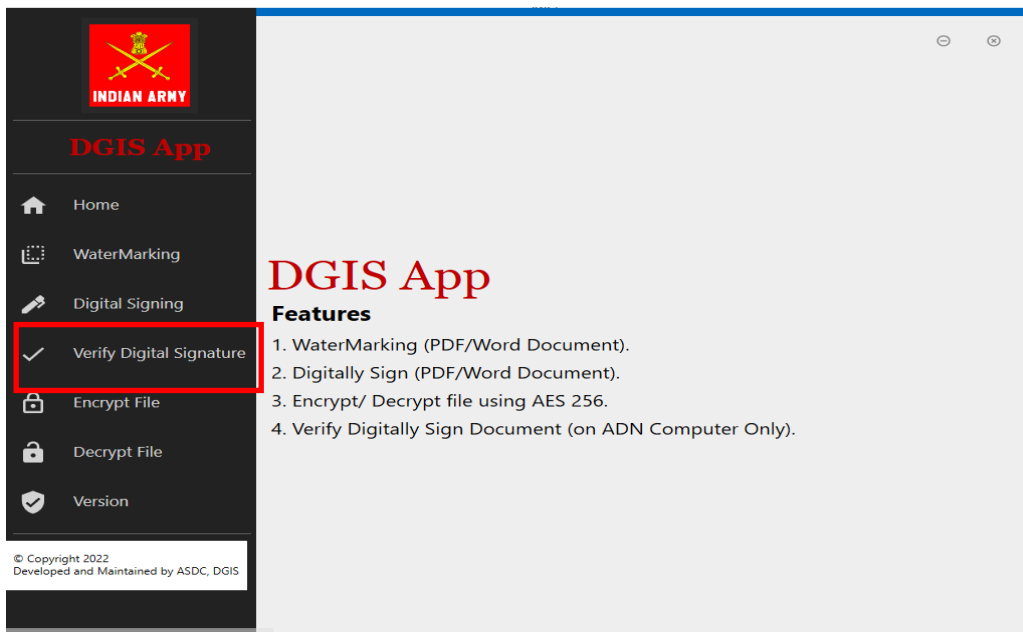

Verify Digital Sign

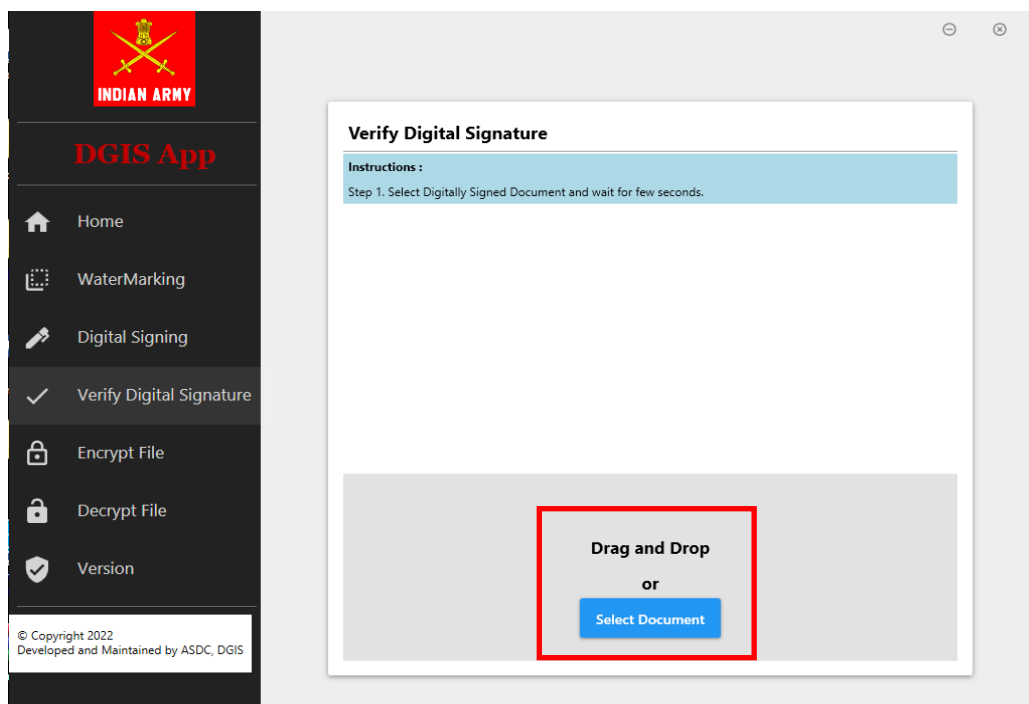

The Digital Signed docu can also be verified with the Appl as well as Adobe.

14. Verify Digital Sign with DGIS App.

- (a) To Verify Digital Sign & click on “**Verify Digital Sign**”.

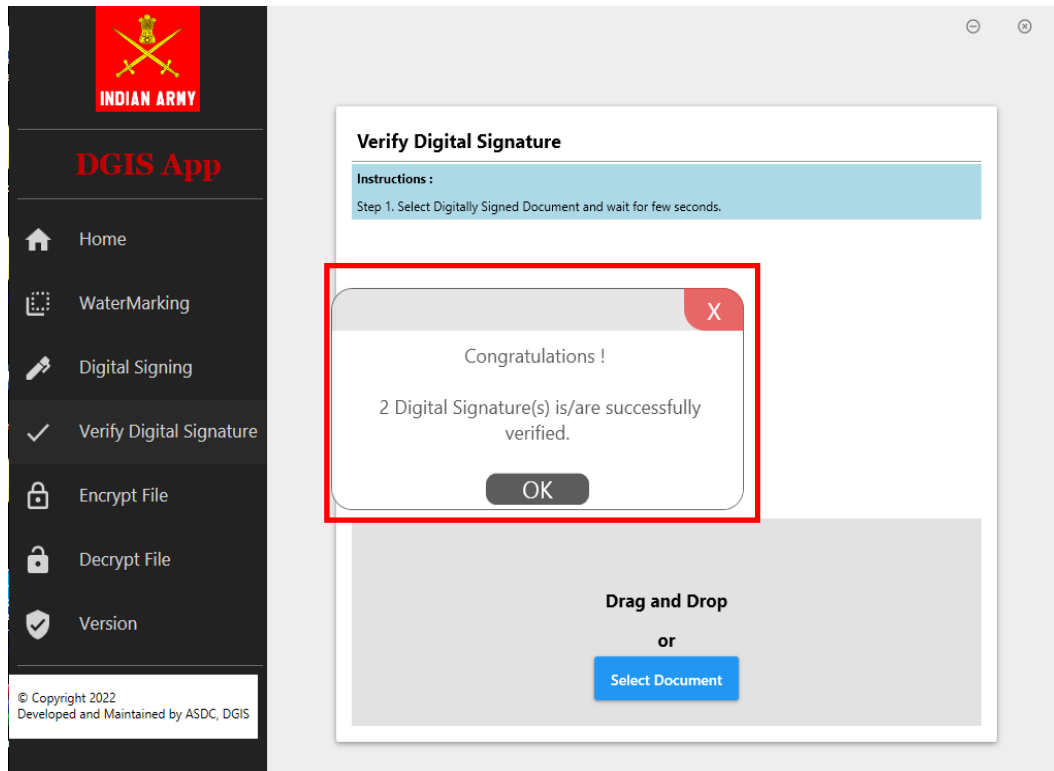

- (b) Select Signed docu or drop the docu on selection window.

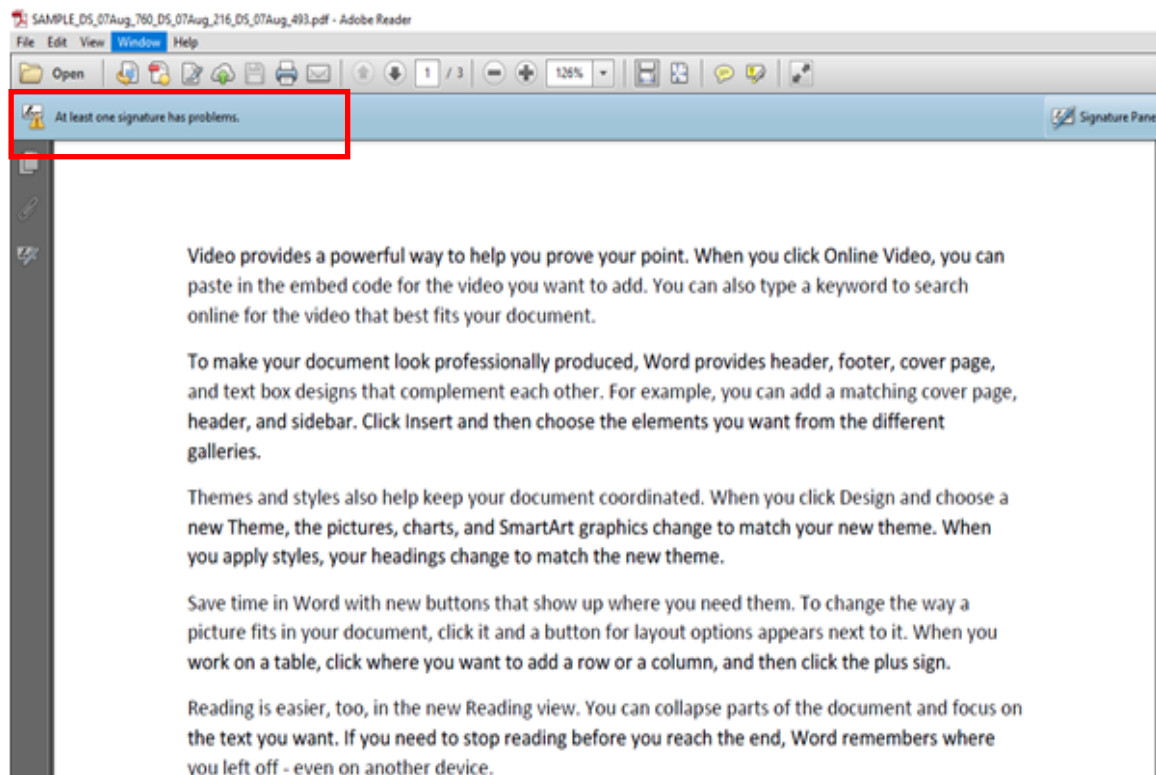

(c) Prompt will confirm the verification of DS.

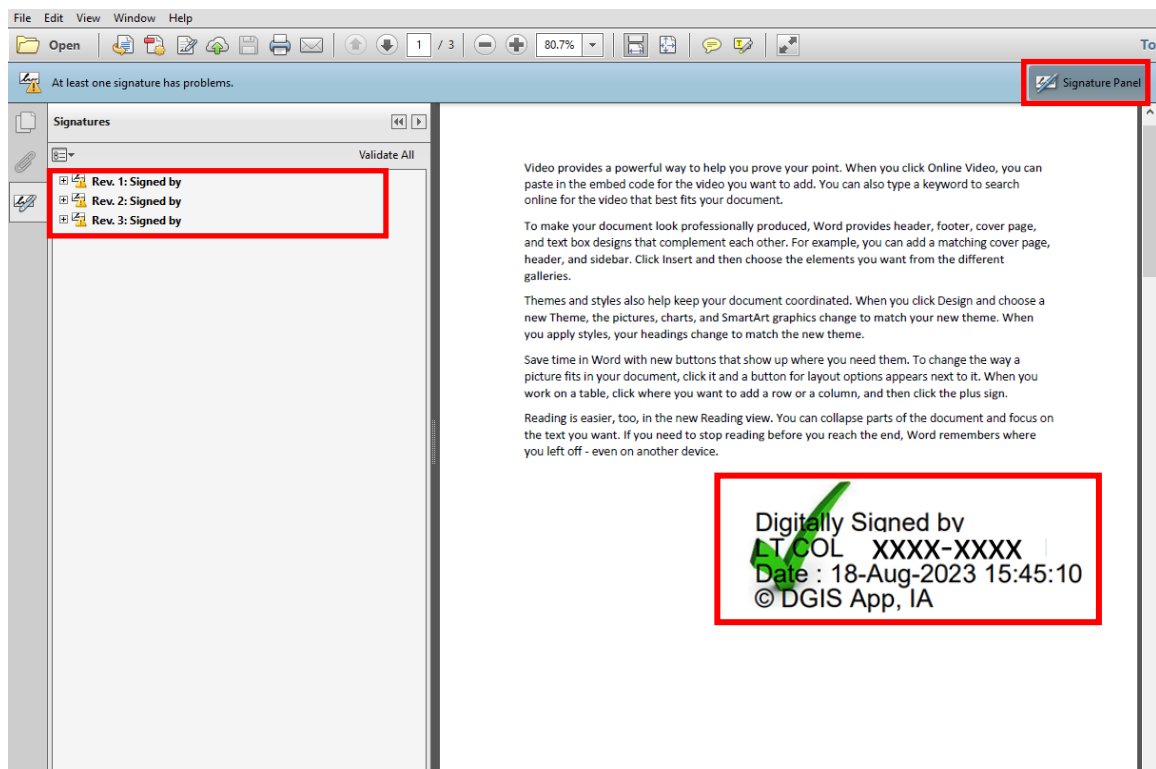

15. Verify DS with Adobe

- (a) Open digitally sign docu with Adobe. Click on **Sign Panel**.

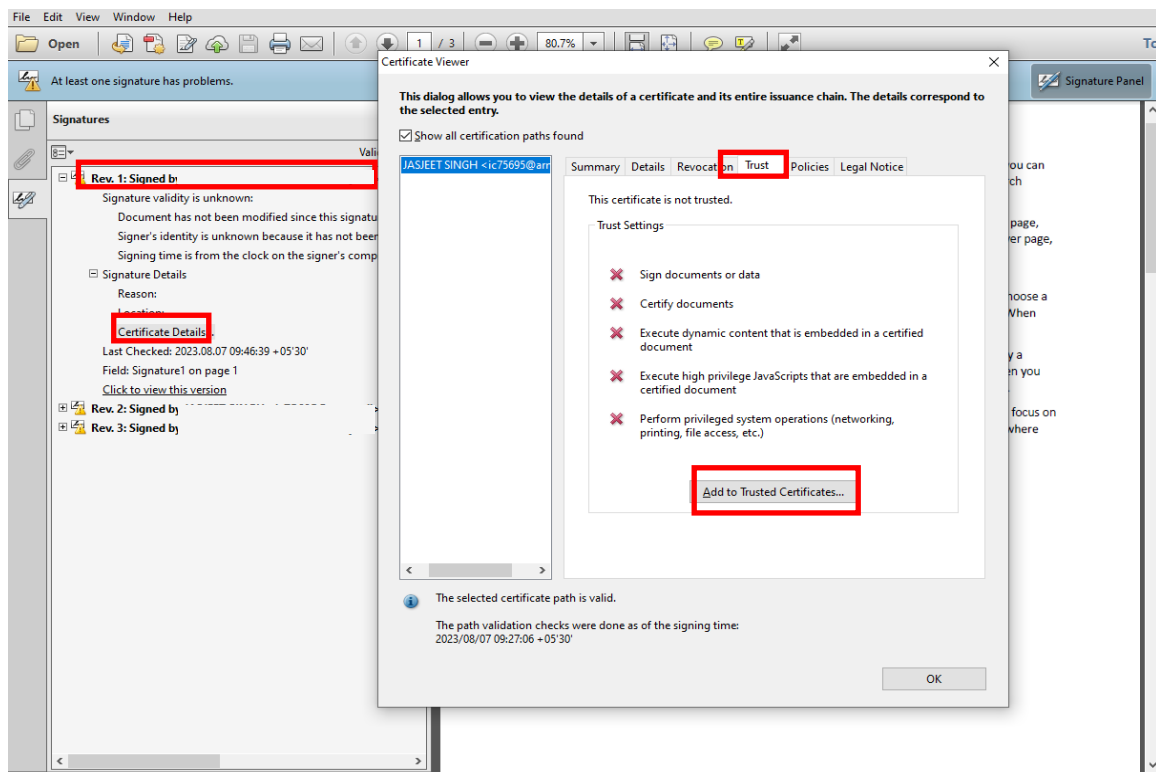

- (b) Expand either of the sign.

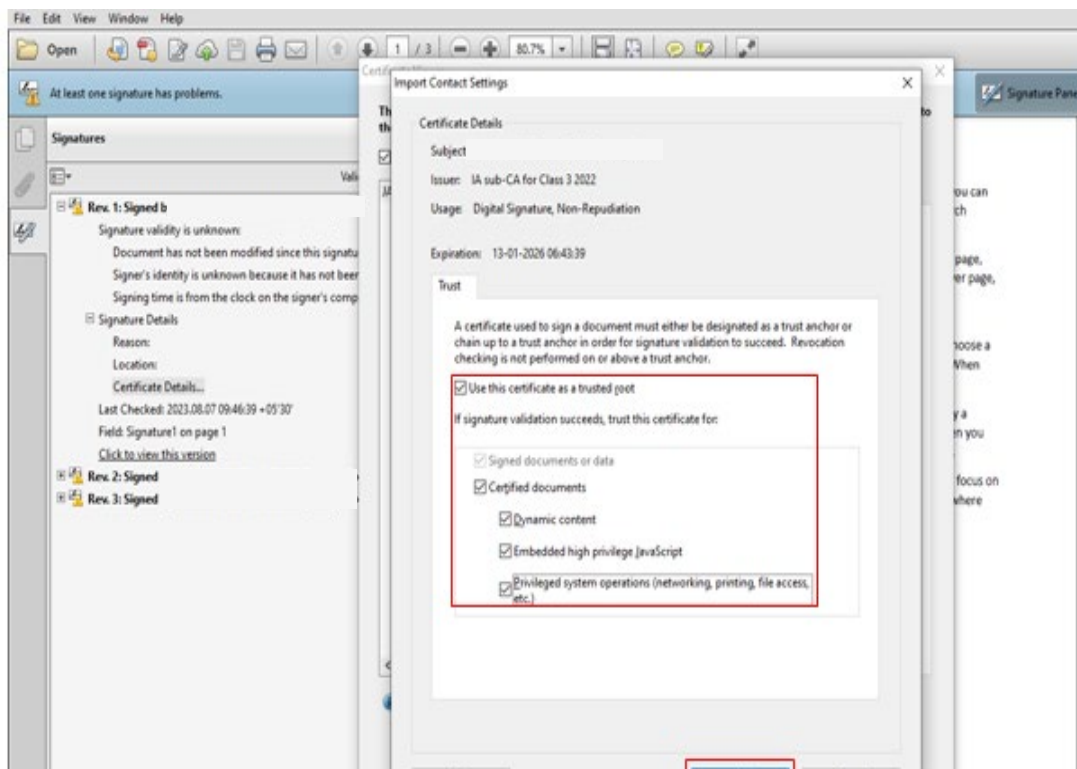

(c) Expand Sign detail & then click on **Certificate details**. On certificate viewer go to **Trust** tab & click on **Add to Trust Certificate**.

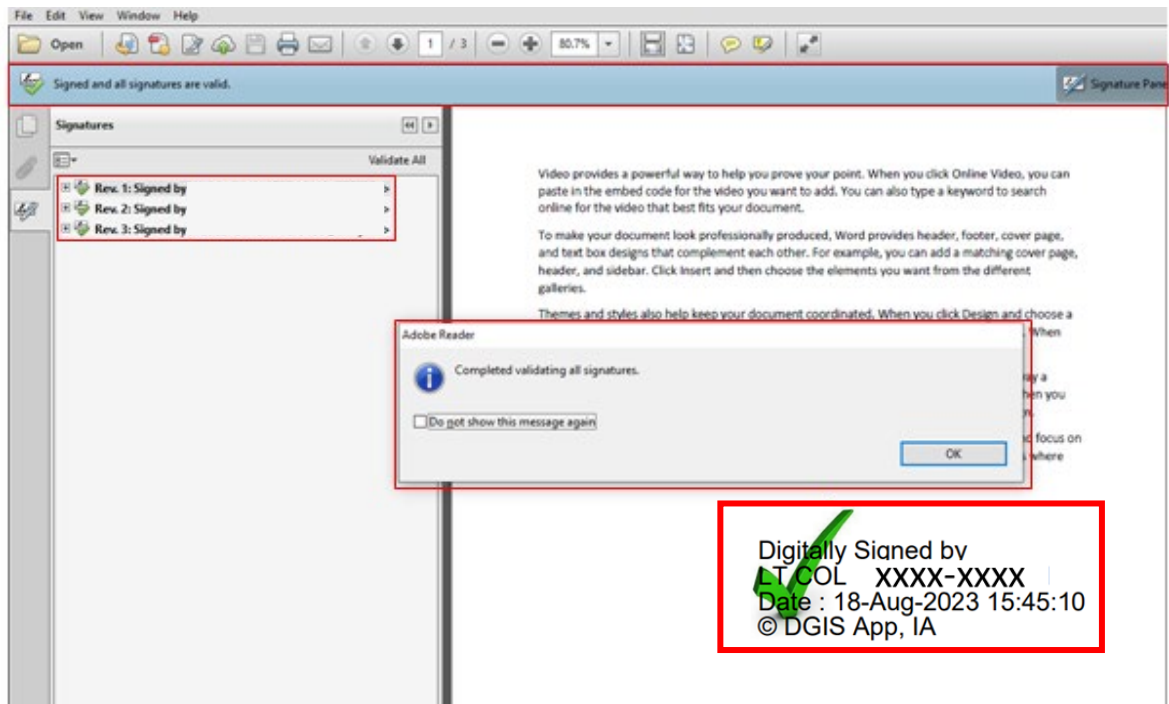

(d) On this prompt check all boxes & click **OK**

(d) Click on Validate All. Digital sign will be validated as shown below:-

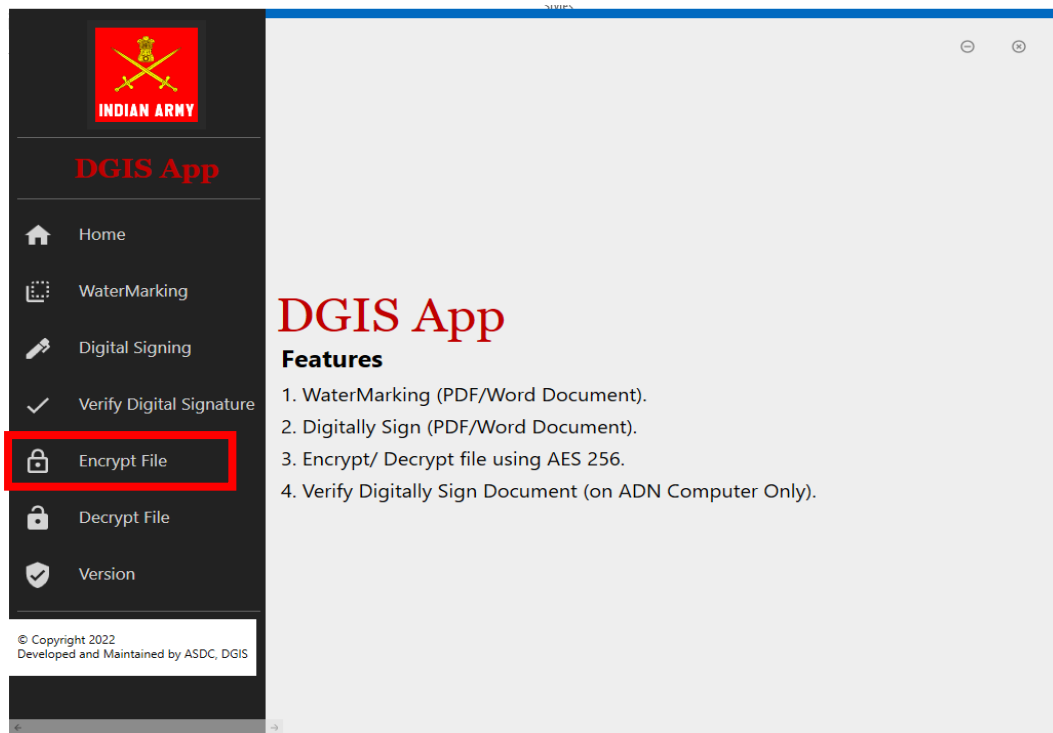

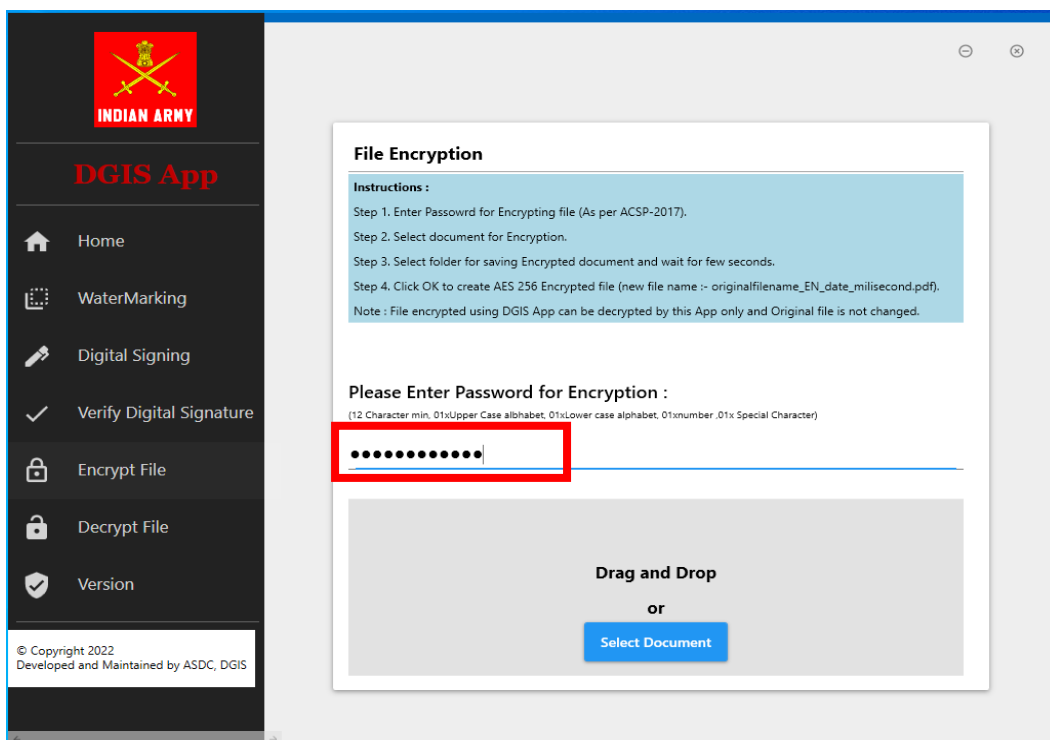

Encryption & Decryption

16. **File Encryption.** The appl can encrypt any single or multiple docu with AES 256 bit encryption. Procedure for encryption is as follows:-

- (a) Open the DGIS App & click on “**Encrypt File**”.

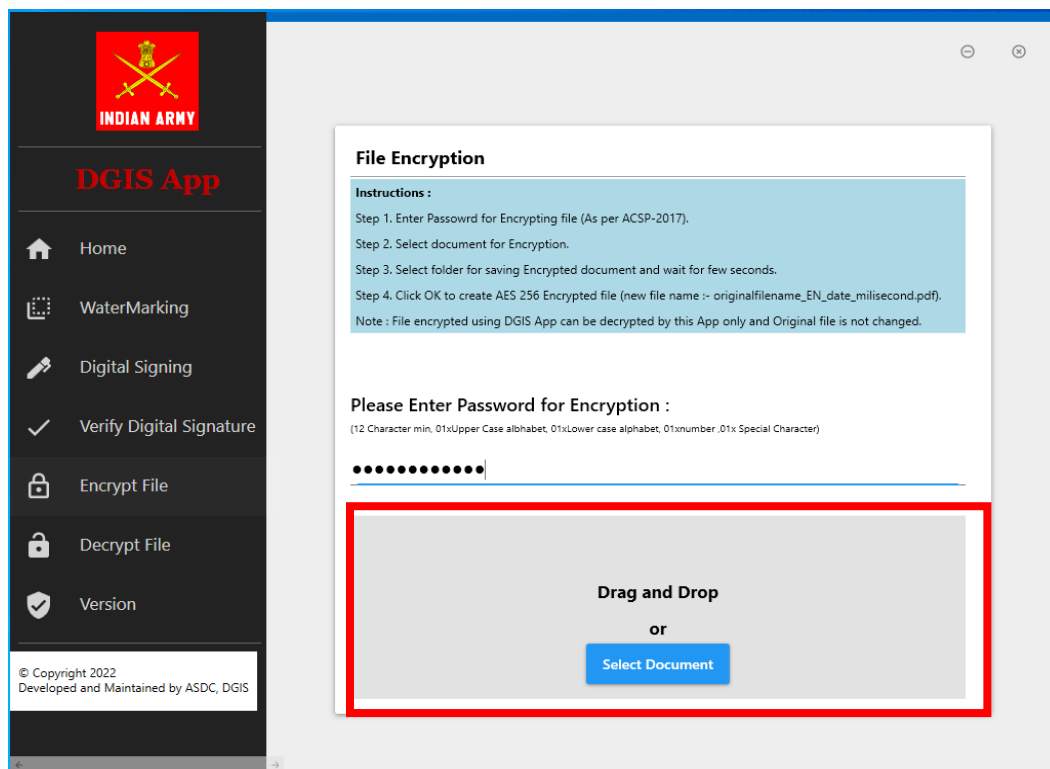

- (b) Enter at least 16-character alphanumeric password including spl characters.

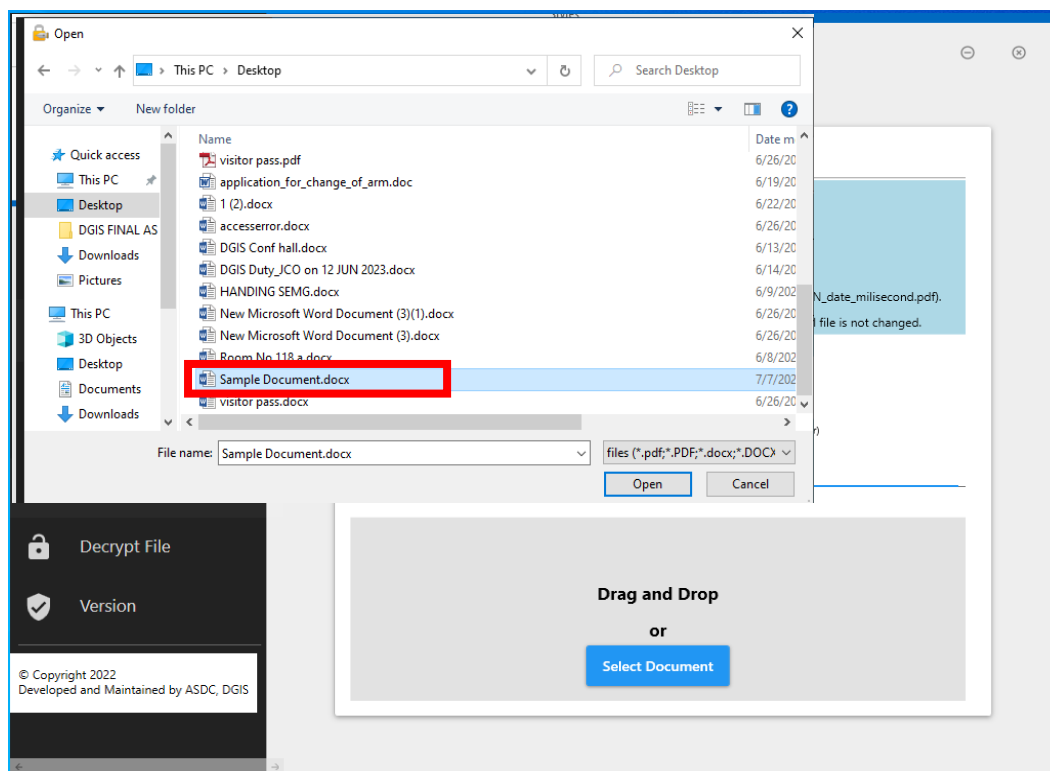

- (c) Click on **select single or multiple docu** or drag & drop the docu on selection window.

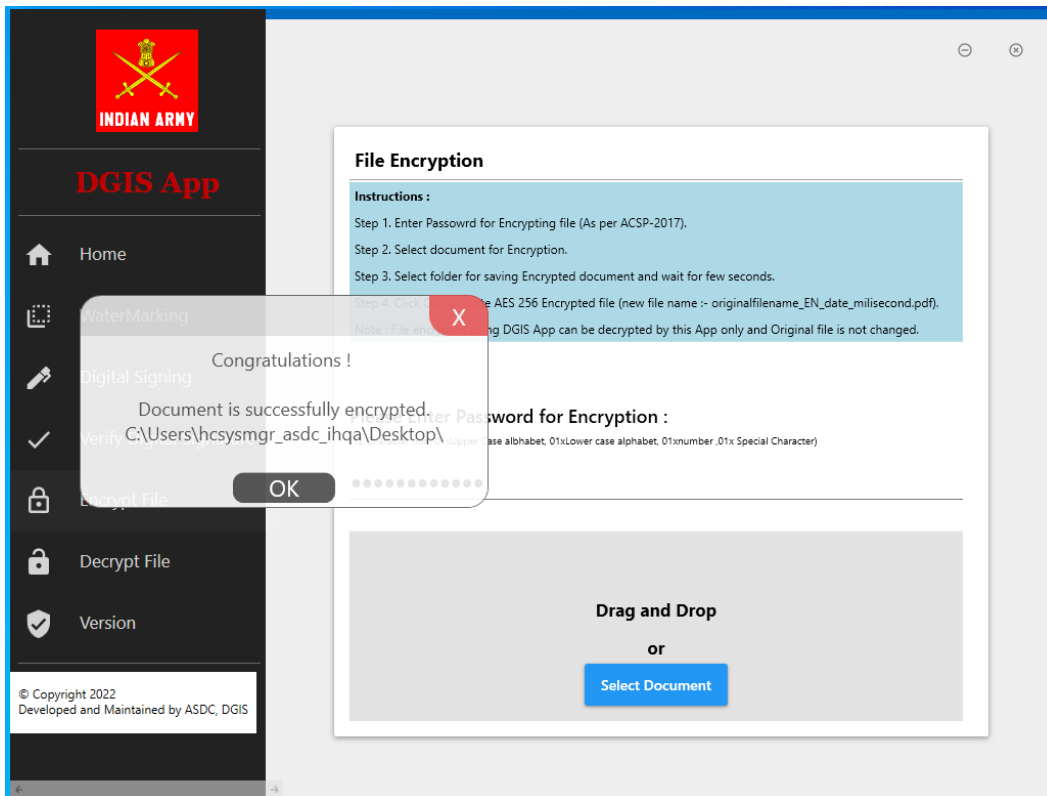

- (d) Browse to the files you want to encrypt > select and wait for next prompt.

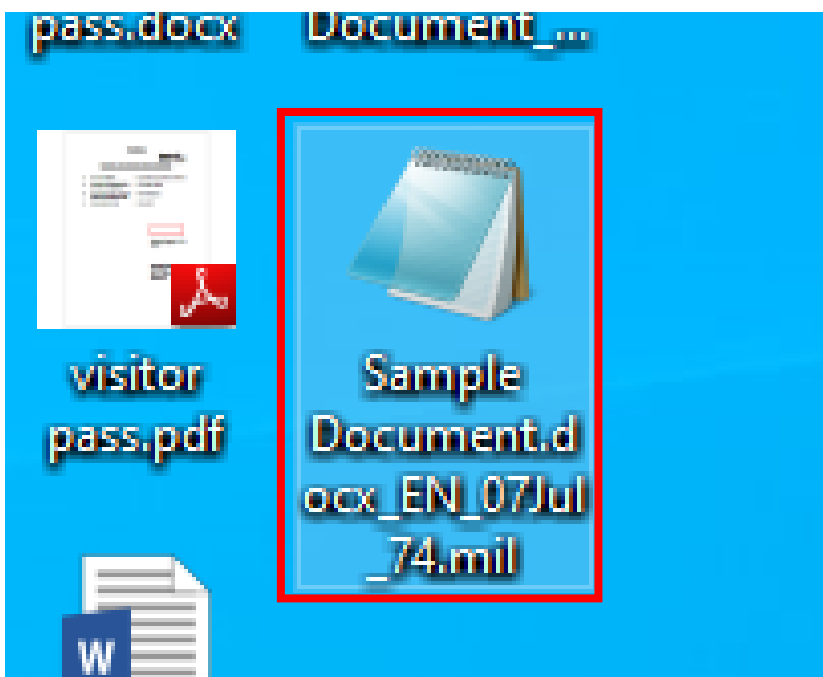

(e) **Congratulation!** prompt confirms the successful encrypt of document with the path of stored docu.

***Note** that the encrypted file/files will be automatically stored at the loc from where the file was selected with different naming convention (Original_name_of_file + **.mil extension**)

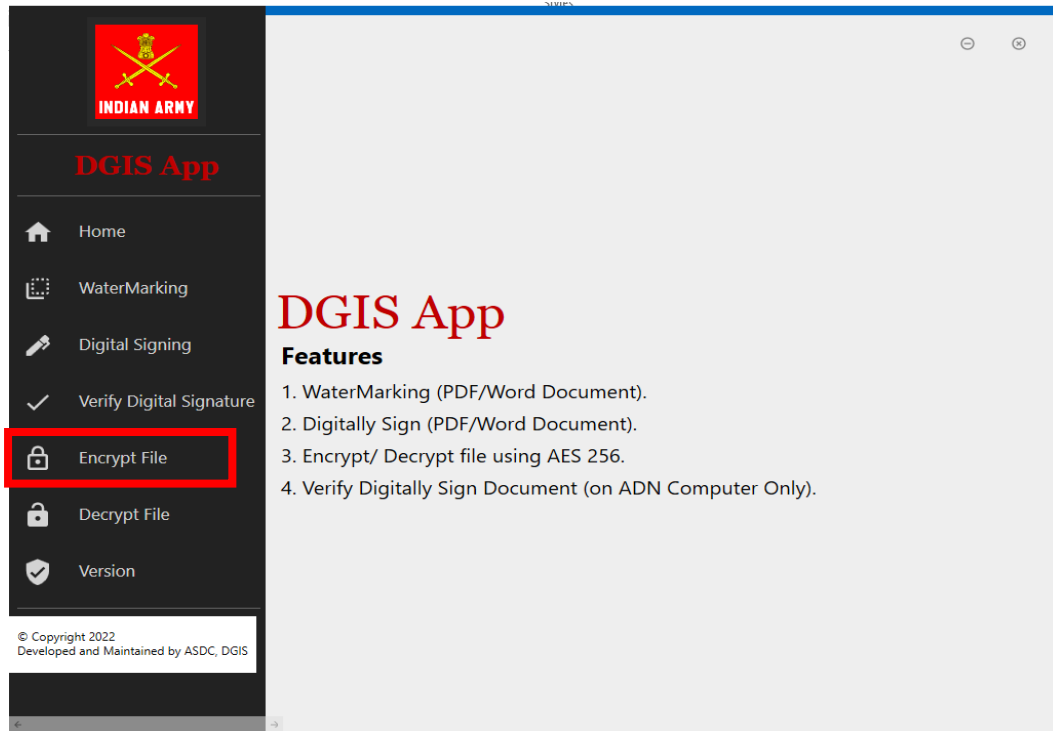

(f) Encrypted file.

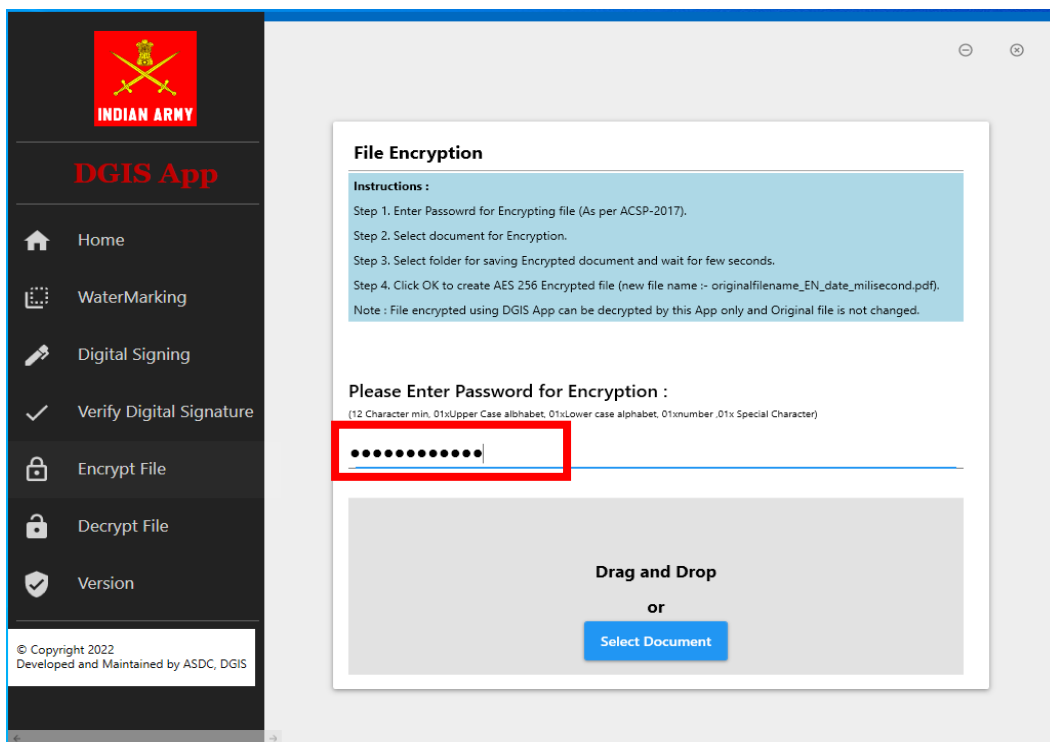

17. **Bulk File Encryption.** The appl can encrypt multiple docu with AES 256 bit encryption. Procedure for encryption is as follows:-

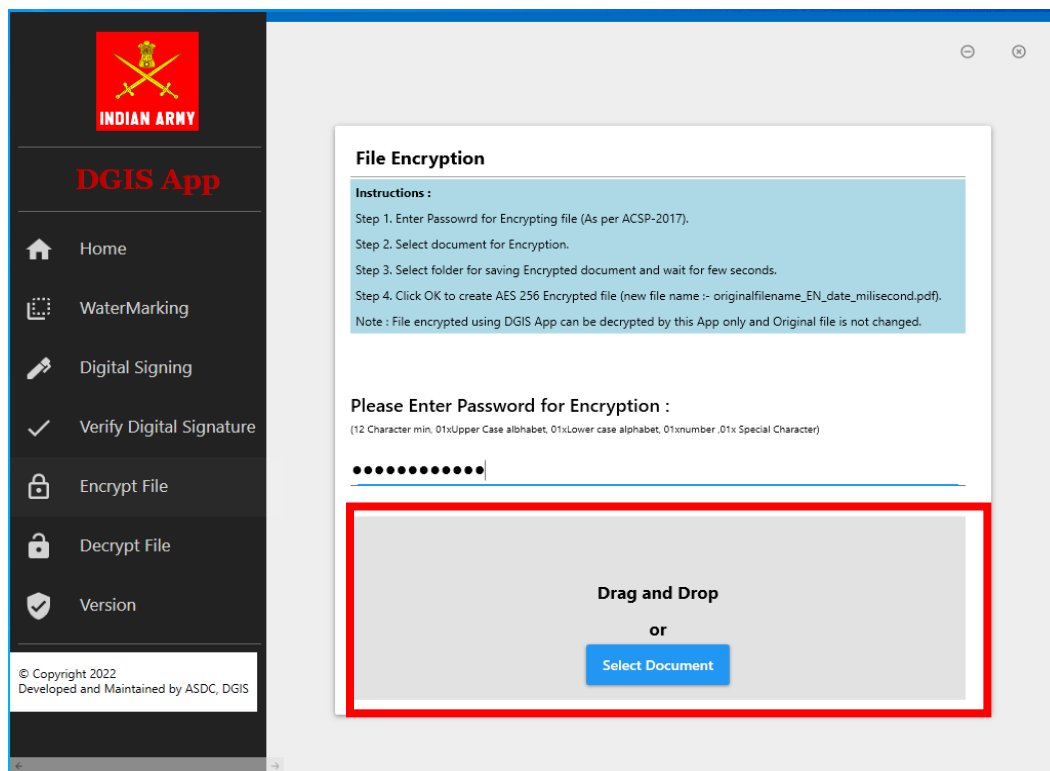

(g) Open the DGIS App & click on “**Encrypt File**”.

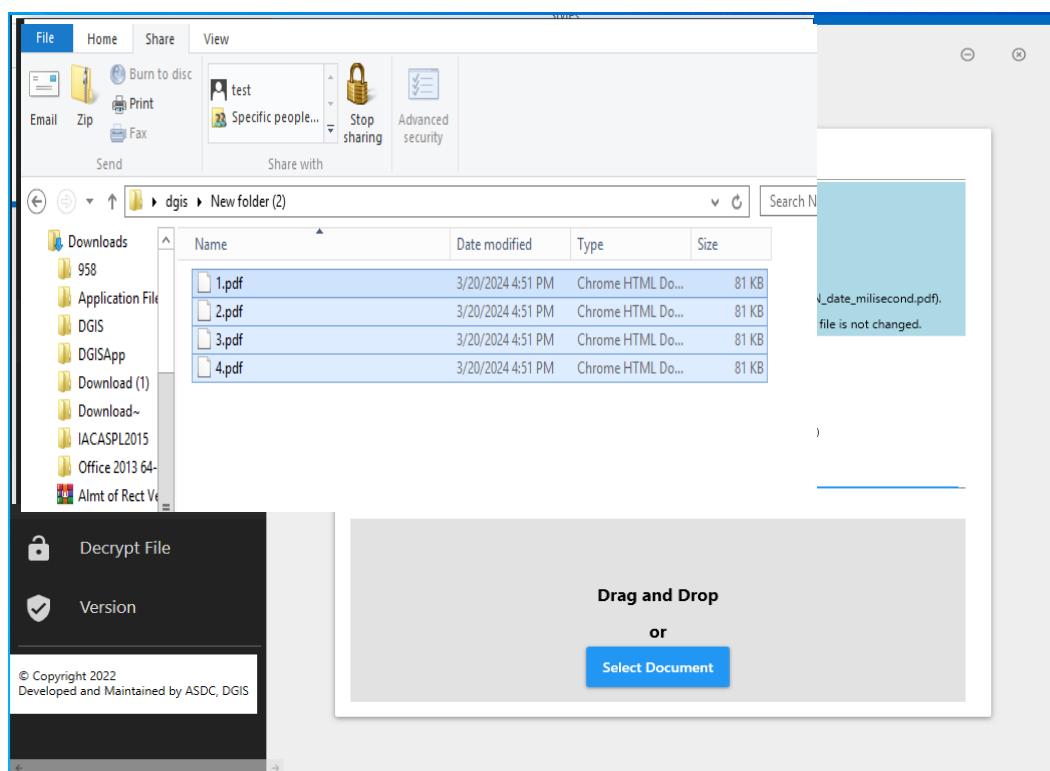

(h) Enter at least 16-character alphanumeric password including spl characters.

(i) Click on **multiple docu** or drag & drop the docu on selection window.

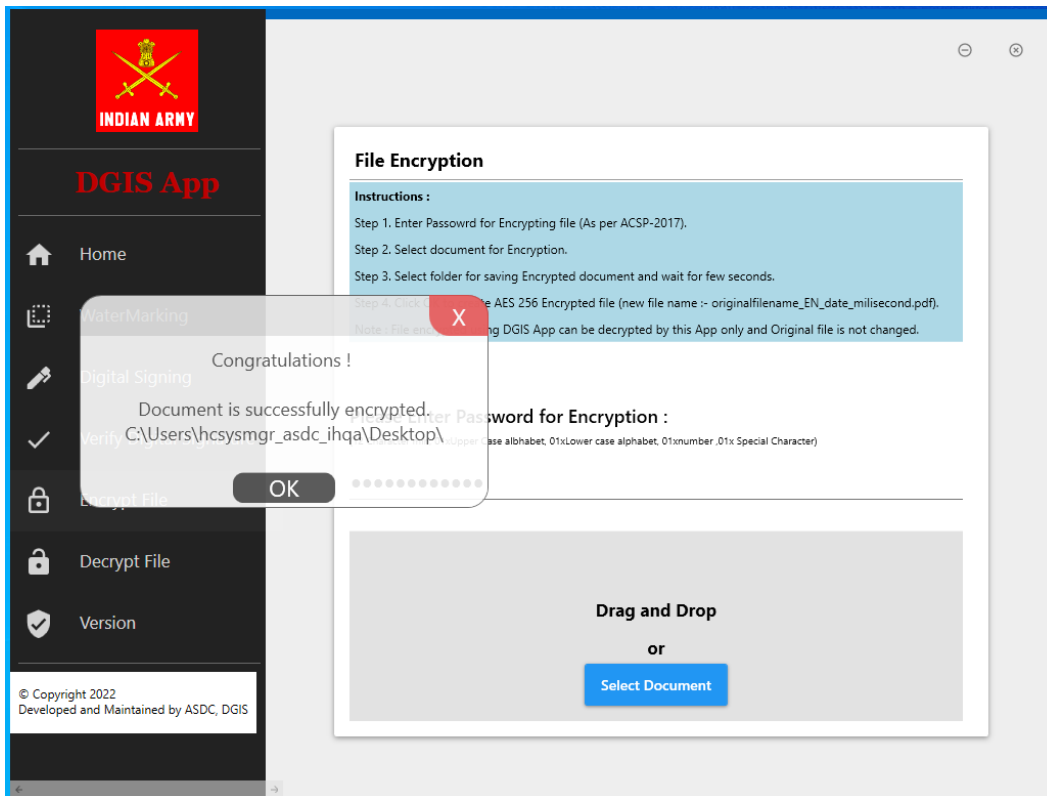

(j) Browse to the files you want to encrypt > select and wait for next prompt.

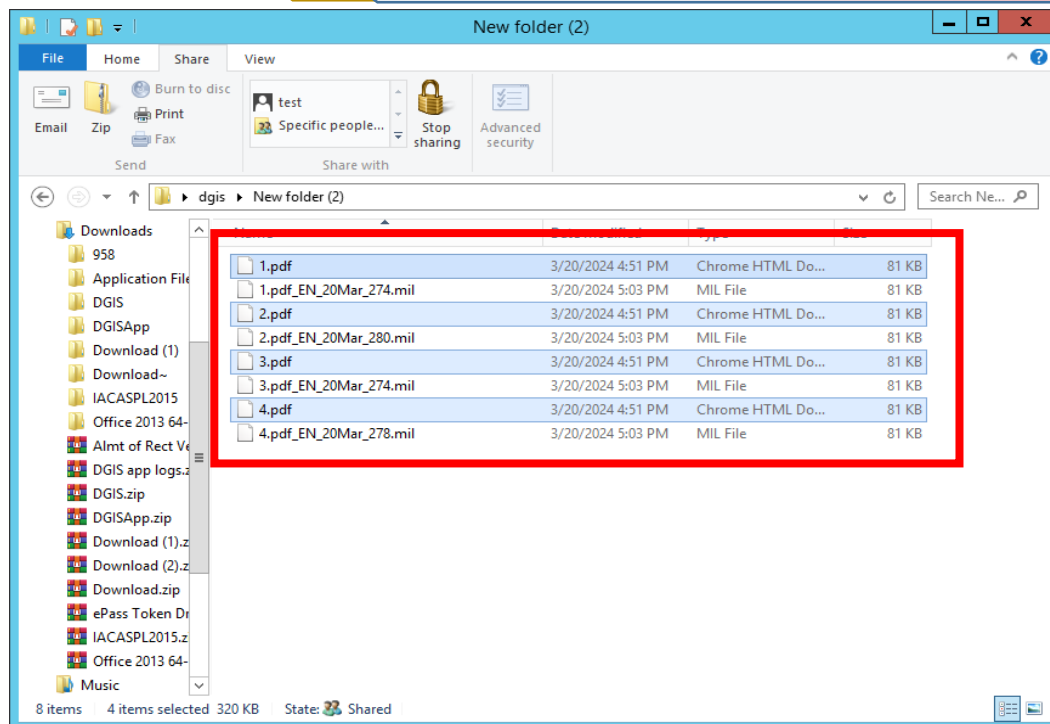

(k) **Congratulation!** prompt confirms the successful encrypt of document with the path of stored docu.

***Note** that the encrypted file/files will be automatically stored at the loc from where the file was selected with different naming convention (Original_name_of_file + **.mil extension**)

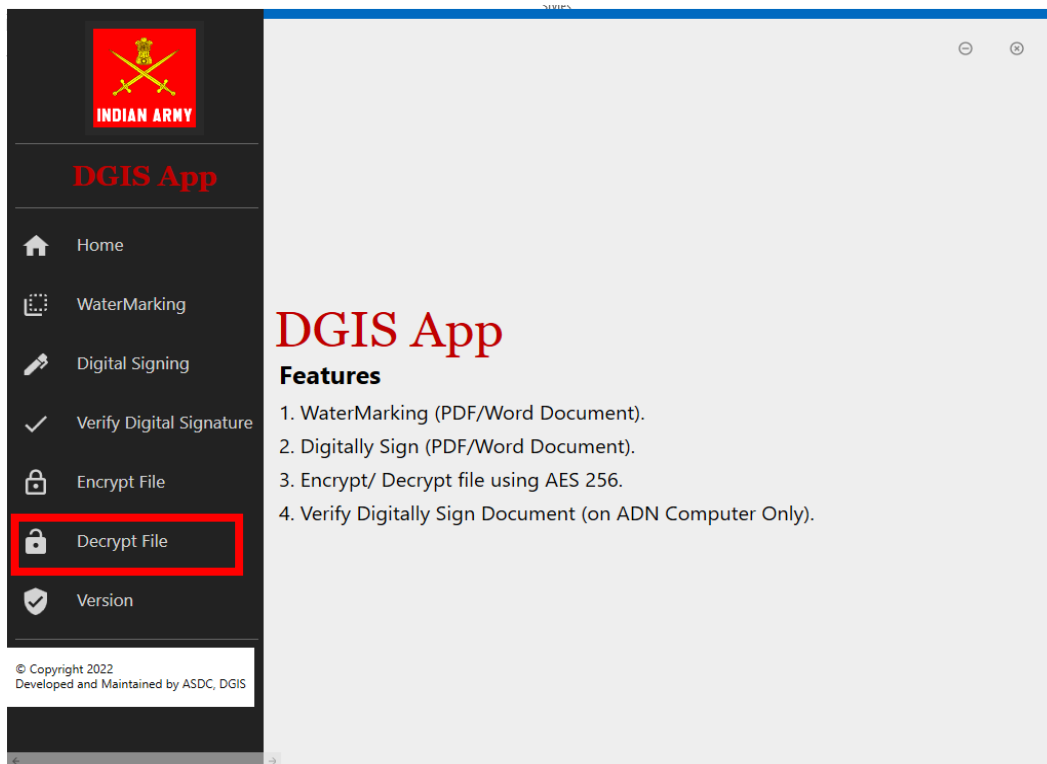

(l) Encrypted files.

18. File Decryption

The appl can only decrypt docu, which are encrypted by DGIS App only. Procedure for decryption of single or multiple docu is same as under:-

- (a) Open the DGIS App & click on “Decrypt File”.

(b) Enter same 16-character alphanumeric password including spl characters as entered while encrypting the file.
